(54) Title: INSPECTION MACHINE AND PROCESS

(57) Abstract: The machine comprises at least a first sheet inspection unit with an inspection cylinder (4) for transporting a printed sheet during inspection, an illumination means (5) and a camera (6) connected to an analysing device, an input transfer cylinder (3) to bring the printed sheet to the at least one inspection unit and an output transfer cylinder (17) to take away the printed sheet from the at least one inspection unit. The inspection unit and the transfer cylinders are arranged in such a manner that the output transfer cylinder (17) takes away the inspected printed sheet only once the inspection is completed.
